PROFESSIONAL SUMMARY

Cloud and DevOps architect with 14+ years building and securing production infrastructure across AWS, Azure and on-premises environments. SecOps and DevOps Lead at DigiBoxx, leading platform engineering, security and a growing applied-AI practice. Proven in designing scalable, highly available systems, building CI/CD and IaC at scale, running cloud security programs, and shipping cost-efficient, reliable services. AWS Certified Solutions Architect Professional and AWS Security Specialty.

CORE SKILLS

- Cloud: AWS, Azure, GCP, VMware, EC2, S3, EKS, Lambda, VPC, IAM, CloudFront, Route 53
- DevOps: Kubernetes, Docker, Terraform, Ansible, Jenkins, GitLab CI, GitHub Actions, Helm, ArgoCD, GitOps
- SecOps: Cloud security, IAM governance, WAF, SIEM, vulnerability management, DevSecOps, image/secret scanning, hardening
- Observability: Prometheus, Grafana, ELK, CloudWatch, Datadog, Alertmanager, incident response, SRE/AIOps practices
- AI/ML: Hugging Face, Qwen, LLM fine-tuning and inference, model serving, RAG, GPU infrastructure
- Platforms: Linux, networking, high availability, autoscaling, cost optimization, DR and backup

PROFESSIONAL EXPERIENCE

SecOps & DevOps Lead Jan 2024 to Present

DigiBoxx Technologies & Digital India Pvt Ltd, Mumbai

- Lead cloud, DevOps and security engineering for DigiBoxx, India's homegrown cloud storage platform, owning architecture, reliability and the security posture of production services.
- Architected and scaled Megh3 Cloud, an S3-compatible object storage platform, and built a high-performance S3-compatible storage application from scratch for enterprise and government workloads.
- Built and run DigiBoxx's internal platform suite end to end — DigiCloud (private-cloud console), DigiCode (self-hosted Git with approval-gated CI/CD, a web IDE and secret scanning), DigiFlow (standalone CI/CD), DigiChat and DigiDesk — containerised and delivered through Jenkins and GitOps behind Cloudflare Zero-Trust.
- Run platform SecOps: Prometheus/Alertmanager monitoring with push-agent ingestion for VPN-isolated hosts, VAPT remediation, Authentik SSO, image and dependency scanning, and DigiSRE — an AIOps bot for alert correlation and signed, whitelist-only auto-remediation.
- Built DigiTasks, a workflow and task-management platform, and OpsCenter, an internal operations and monitoring console that centralizes infrastructure health, alerting and deployment visibility.
- Stood up an applied-AI practice: deploying and fine-tuning open models (Hugging Face, Qwen) for inference, and building DigiSahayak, an AI assistant that helps users and support teams with product guidance.
- Hardened the cloud security program across IAM, network segmentation, WAF, secrets management and vulnerability remediation, embedding DevSecOps gates into CI/CD pipelines.
- Drove cost optimization, autoscaling and multi-AZ high availability, improving reliability and reducing cloud spend across the platform.

DevOps Lead Nov 2022 to Nov 2023

Lybl Healthcare, Noida

- Led DevOps for a healthcare platform, designing CI/CD, infrastructure-as-code and secure, compliant cloud environments.
- Delivered the Toyota TSAM (South Africa) enterprise platform (2022 to 2023), building and operating its cloud infrastructure and deployment pipelines.
- Automated provisioning with Terraform and Ansible and standardized Kubernetes-based deployments.

Solution Architect Dec 2021 to Jun 2022

Engro, Hyderabad

- Designed cloud reference architectures and migration strategies for enterprise workloads.
- Defined security, networking and cost baselines for AWS deployments.

Lead Architect, AWS & DevOps Aug 2021 to Nov 2021

Neuralmetrics, Chennai

- Architected AWS infrastructure and DevOps tooling for a data and analytics product.
- Implemented IaC, CI/CD and observability for rapid, reliable releases.

Tech Lead Dec 2020 to Jun 2021

Adcuratio, Bengaluru

- Led the engineering platform for an addressable-advertising product, owning cloud infrastructure and delivery.
- Built scalable pipelines and automated deployment workflows.

DevOps Lead

Sep 2018 to Sep 2020

Goomo, Bengaluru

- Operated and scaled a travel platform on AWS with 200+ EC2 instances across production and staging.
- Built the Lifafa gift-cards platform (2018 to 2020) and its supporting cloud infrastructure and CI/CD.
- Introduced autoscaling, monitoring and cost controls, improving uptime and reducing spend.

IT Server Administrator

May 2015 to Dec 2017

Travel Centric / HotelHub

- Administered servers, networking and virtualization for a travel-technology business.
- Maintained high availability, backups and disaster recovery for production systems.

System Administrator

Feb 2011 to May 2015

Logix / Izmocars

- Managed Linux and Windows server infrastructure, networking and user support.
- Implemented monitoring, patching and backup processes.

KEY PROJECTS

Megh3 Cloud & S3-Compatible Storage (DigiBoxx)
Scalable, S3-compatible object storage platform and a from-scratch storage application for enterprise and government workloads.

DigiCloud, DigiCode & DigiFlow (DigiBoxx)
Private-cloud console, a self-hosted Git platform with approval-gated CI/CD and a Security Center, and a standalone CI/CD product that builds any repo in Docker.

DigiSRE & OpsCenter (DigiBoxx)
AIOps bot for multi-source alert correlation and auto-remediation, plus an internal operations console for infrastructure health, alerting and deployments.

DigiSahayak AI Assistant (DigiBoxx)
AI assistant built on open models (Hugging Face, Qwen) for product guidance and support automation.

Toyota TSAM, South Africa
Enterprise cloud platform delivery and operations (2022 to 2023).

Lifafa Gift Cards
Gift-cards platform with its cloud infrastructure and CI/CD (2018 to 2020).

CERTIFICATIONS

- AWS Certified Solutions Architect - Professional
- AWS Certified Security - Specialty
- VMware Certified Associate - Data Center Virtualization (VCA-DCV)
- Microsoft Certified Solutions Associate (MCSA)

EDUCATION

Bachelor of Computer Applications (BCA) - Mangalore Institute of Management & Engineering
Pre-University (PUC) - Jnanodaya Pre-University College, Bengaluru
